Hello Residents of Bordentown City,

Given the seriousness of the ongoing COVID 19 outbreak, Mayor Lynch wishes to convey to all city residents that he has been in communication with representatives from the Federal, State, and County governments including Congressman Andy Kim’s office; Governor Murphy’s office; and with Dr. Herb Conaway, Director of the Burlington County Health Department. He encourages all residents to continue to follow the Center for Disease Control and Prevention (CDC) guidelines for personal hygiene and social interaction. Further information is available at www.cdc.gov. Rest assured that the full resources of our city government are in place should they be needed and will work in coordination with other government agencies.

In the interim, Bordentown City municipal services will continue to operate as normal until such time we are advised otherwise. City Hall will be OPEN for normal business, should you need it. Public Works and trash collection will continue as normal. Our Police and Fire Chiefs from the City and Township are working closely with County health officials to coordinate resources and monitor the ongoing situation.

Again, Mayor Lynch urges residents to be vigilant with their hygiene and conscientious of their social interactions. If you feel ill or not 100%, stay home. In the event you have a medical emergency, please continue to dial 9-1-1 and advise the call-taker if you are experiencing flu like symptoms.

If there are any developments and if circumstances should change, notice will be posted on the city website, the various city notification systems, and on social media.

While this can be a tense and stressful time for many residents for a multitude of reasons, we urge everyone to remain calm and as always, we will get through this TOGETHER!

Thank You,

Mayor James E. Lynch, Jr.
Deputy Mayor John C. Brodowski
Commissioner Joseph D. Myers
